

CIRCULAR**Sub.: Guidelines for Capstone Project FALL 2026-27 Semester –2023 Batch
B.Tech all programmes**

Students are expected to carry out an innovative project work during their penultimate semester of study for the credits prescribed under UC of their curriculum, in or related to the specialization of the programme by applying the knowledge they have gained in the courses/ labs they have undergone so far.

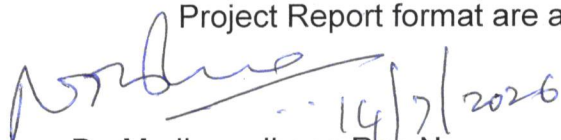

The following guidelines have to be adopted to register for Capstone Projects

1. The Capstone Project Proposal format attached along with this Circular has to be submitted to the guide for completion of registration process.
2. In case the student does not have any courses to register and Backlog courses pending, the student may be permitted to carry out the project outside the University, viz. in an industry, private/ government organization, or academic/ research institution.
3. In case of projects outside the University, there will be an external guide with the industry/ organization of work and an internal guide within the School the student belongs.
4. Submitting a project that was bought (purchased)/ borrowed/ submitted in another University/ Institution shall be considered as examination malpractice and will be awarded an 'F' grade and the student has to re-register and clear the student project in a subsequent semester. Failure/ absence in the final viva-voce examination results in re-registration of the project.
5. Projects are expected to have hardware implementation along with any software component. If not, at least they should have significant design aspects with an application to real world problems.
6. If any additional equipment is required other than what is available in the University, the students have to bear the costs on their own or from the research grants available with the concerned guide.
7. The daily attendance should be given in the designated location in the campus for Capstone and students should meet the guide on regular basis.

8. The final project report will be evaluated by a panel of examiners consisting of Programme Chair as Chairman of the Committee, External Examiner, three Internal Experts, and Guide after which an oral examination will be conducted.
9. The Dean of the programme School will nominate members of the Committee.
10. The project work should be executed for a minimum period of one Semester to qualify for the credits specified under UC of their curriculum.
11. The following is the evaluation schedule

Evaluation Process	Tentative Dates	Marks
First Review	18 th - 22 th August 2026	10
Second Review	29 th September – 3 th October 2026	30
Final Review	17 th - 21 th November 2026	40
Project Report and Supporting Material (Poster, CD etc)	By 20 th November 2026	20

12. Absolute grading will be applied for the Capstone evaluation
13. The Programme Chairs/ HoDs will be monitoring the smooth conduct and consolidation of the marks for each review separately and keep the record for final submission
14. Under exceptional circumstances students can give the review in online mode with prior permission from guide and Programme Chair
15. The Programme Chairs/ HoDs will share the format for final report separately
16. Guides should ensure that the student in the final report duly incorporates a record of all codes, standards and software tools used in the project
17. The student has to compulsorily submit digital copy of the final report to the guide and School office. This can be a single pdf file, which can be uploaded on V-Top. The final grade will be generated only after this process is complete
18. An Evaluation Committee consisting of all Deans will judge one 'Best Capstone Project' award provided any project have outstanding outcomes. Such project will receive the award during the University Day
19. Capstone Project Proposal, Capstone Project evaluation rubrics and Capstone Project Report format are attached along with this Circular
